TECHNICAL SKILLS

Languages:	C++, JavaScript (ES6+), Python, SQL, Java, TypeScript
Frontend:	React.js, Next.js, HTML5, CSS3, Tailwind CSS, Redux Toolkit
Backend:	Node.js, Express.js, REST APIs, WebSockets, JWT Authentication
Databases:	MongoDB, PostgreSQL, Redis, Mongoose ODM
DevOps & Tools:	Git, GitHub, Docker, Postman, Vercel, AWS (EC2, S3), Linux
Data Science:	pandas, NumPy, scikit-learn, Matplotlib, Jupyter

PROJECTS

ShopStream – Full-Stack E-Commerce Marketplace

- Built a multi-vendor e-commerce marketplace with role-based dashboards (buyer, seller, admin) supporting 500+ product listings and real-time order tracking.
 - Designed a RESTful API layer with 25+ endpoints using Node.js/Express.js; implemented JWT + refresh token auth with rate limiting and input sanitization.
 - Integrated Razorpay payment gateway with webhook verification; used Redis caching to reduce cart-load latency by ~60%.
 - Deployed on AWS EC2 with Nginx reverse proxy and MongoDB Atlas; CI/CD via GitHub Actions for zero-downtime deployments.
- Tech Stack:** React.js, Node.js, Express.js, MongoDB, Redis, Redux Toolkit, Razorpay API, AWS EC2, Docker

SyncBoard – Real-Time Collaborative Whiteboard

- Developed a real-time collaborative whiteboard supporting 10+ concurrent users with <50ms sync latency using Socket.IO for bi-directional WebSocket communication.
 - Implemented CRDT-based conflict resolution to handle simultaneous edits without data loss, ensuring eventual consistency across all connected clients.
 - Built a custom Canvas rendering engine with undo/redo (command pattern), shape tools, freehand drawing, and exportable PNG/SVG at 60fps.
 - Added persistent board storage with PostgreSQL and OAuth 2.0 (Google) authentication with shareable invite links.
- Tech Stack:** Next.js, TypeScript, Socket.IO, PostgreSQL, Prisma ORM, OAuth 2.0, HTML5 Canvas, Tailwind CSS, Vercel

PredictLens – ML-Powered Student Performance Analytics

- Built an end-to-end ML pipeline predicting student academic performance with 89.2% accuracy (Random Forest) trained on 10,000+ records from UCI datasets.
 - Engineered 15+ features using pandas; applied SMOTE for class imbalance and hyperparameter tuning via GridSearchCV.
 - Developed an interactive React.js dashboard with Chart.js visualizations and SHAP-based explainability for per-student predictions.
 - Exposed the model through a FastAPI backend; containerized with Docker and deployed on Vercel (frontend) + Railway (backend).
- Tech Stack:** Python, scikit-learn, pandas, FastAPI, React.js, Chart.js, Docker, PostgreSQL, Railway, Vercel

EXPERIENCE

Web Development Trainee | IBM SkillsBuild x AKTU Program

May 2026 – Present | Remote

- Built a task management dashboard handling 100+ concurrent users with dynamic filtering, drag-and-drop Kanban boards, and real-time status updates.
- Reduced bundle size by 35% through code splitting, lazy loading, and asset optimization; achieved Lighthouse performance score of 92+.
- Authored 20+ unit tests using Jest; maintained >85% code coverage across the project.

Marketing & Sponsorship Lead | Entrepreneurship Cell, ABESEC

Aug 2025 – Apr 2026 | Ghaziabad

- Secured Rank 56 out of 17,000+ teams at IIT Bombay's National Entrepreneurship Challenge.
- Led corporate outreach for 3+ campus events (200+ attendees each); managed end-to-end event logistics and anchored ceremonies.

ACHIEVEMENTS & PROFILES

- Rank 56 / 17,000+ teams – National Entrepreneurship Challenge, IIT Bombay (2025)
- Official anchor and public speaker for college-wide events at Entrepreneurship Cell, ABESEC

EDUCATION

B.Tech in Computer Science & Engineering (Data Science)

ABES Engineering College (ABESEC), Ghaziabad | Jul 2024 – Jul 2028 | CGPA: 7.5

- Coursework:** Data Structures & Algorithms, DBMS, OOP (C++), Operating Systems, Computer Networks, Web Technologies, Statistical Learning
